

MENNO hygiene program for plant and food production

In addition to phyto-pathogenic pathogens that endanger seeds and crop yields, pathogens such as EHEC, salmonella, e-coli, legionella and many more must also be prevented. However, disinfectants for such applications must not leave any residues, such as QAVs (BAC and DDAC). It is therefore important to establish an optimally coordinated hygiene program consisting of cleaning and disinfection for surfaces and personnel applications.

MENNO® Florades

FiBL listed for organic production

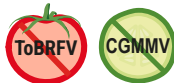

Disinfectant for use in horticulture, vegetable growing and agriculture

Surface disinfectant for tomatoes, cucumbers, peppers etc.

Potato, cabbage, onion, root and tuber vegetables in storage.

Application: against phytopathogenic viruses (ToBRFV, CGMMV etc.), viroids, bacteria (Erwinia, Xanthomonas, Ralstonia, Clavibacter etc.), fungi (Fusarium, Botrytis etc.).

Active substance: 90 g/l benzoic acid
BVL approval no.: 044407-00

A-QUASAN®

FiBL listed for organic production

Disinfectant for use in the animal feed and food sector

and areas in greenhouses where food is processed.

For protection against human pathogens, bacteria (such as salmonella, legionella, e-coli, EHEC etc.), fungi and yeasts.

For equipment, machines, crates, boxes, work and transport surfaces, pipes, air humidification systems in cold stores, warehouses and greenhouses, etc.

Active ingredients: 90 g/l benzoic acid
baua approval number: DE-0020842-03-04

FADEX® Rapid

FiBL listed for organic production

Ready-to-use cleaning agent

for cleaning gloved hands at the washbasin under running water and for wiping with a disposable paper towel during operation.

For removing organic and inorganic soiling, plant sap, plant residues and chemical contamination.

FADEX® H+

FiBL listed for organic production

Acidic, foaming cleaning agent

Cleans soiling from glass, plastic, metal, crates, machines, appliances, etc.

High cleaning efficiency against starch deposits (potatoes), wax (apple, orange), plant juice, sugar, chlorophyll and mineral incrustations.

FADEX® -OH

FiBL listed for organic production

Alkaline, foaming cleaning agent

Cleans soiling from glass, plastic, metal, crates, machines, equipment, etc.

High cleaning efficiency against soil deposits (heavy soils), plant juice, sugar, color residues (carrots, black salsify, beet etc.).

FADEX® -OHX

FiBL listed for organic production

Alkaline, defoamed detergent

e.g.: for use in washing machines

Use disinfectants with caution. Always read the label and product information before use
